UNSAFE MATERIAL EXCAVATION

NOTE:
1. Before starting construction, the site must be surveyed and field conditions must be confirmed.
2. Excavation and backfilling should be performed by professionals.

BUILDING SEWER DETAILS

NOTES:
1. Delineate sewer connections to be covered by concrete before backfilling.
2. Ensure that all connections are properly sealed to prevent leaks.

ELEVATION

NOTE: This is a reference section for the sewer system construction. Refer to the main plan for detailed specifications.

PLANT STATION DETAIL

NOTES:
1. Plan station details are provided for reference. Please consult the main plan for more information.
2. All plant station details must be verified by a qualified technician.
